Unleashing the future of sports performance through reaction light training, intelligent insights from the Hiveact app and a global community united to get faster, stronger and more agile together.

Hiveact is inclusive,
designed to encourage
everyone to thrive
in their fitness journey.

What is Hiveact?

Hiveact is a health-tech brand born from sport-tech DNA.

Its intelligent reflex training system, accessible through the **Hiveact app**, empowers users with a wide range of exercises and detailed performance metrics, including **reaction time, speed, agility, coordination, decision-making, peripheral vision, and more.**

Developed for athletes, sports medicine professionals, and individuals in physical or cognitive rehabilitation, **Hiveact** leverages advanced technology and actionable insights to optimize performance, accelerate recovery, and enhance mental acuity while creating a dynamic and engaging training and rehabilitation experience.

athletes, coaches, teams, therapists,
educators, families and wellness professionals.
One platform, endless applications.

Innovation
that powers
your **every**
move.

Elevating Neurocognitive Training and Recovery

Interactive Reaction

Training (IRT) is a training method used by athletes to optimise their performance in sports and everyday life. It involves exercises that challenge their ability to react quickly to stimuli, whether visual, auditory or tactile.

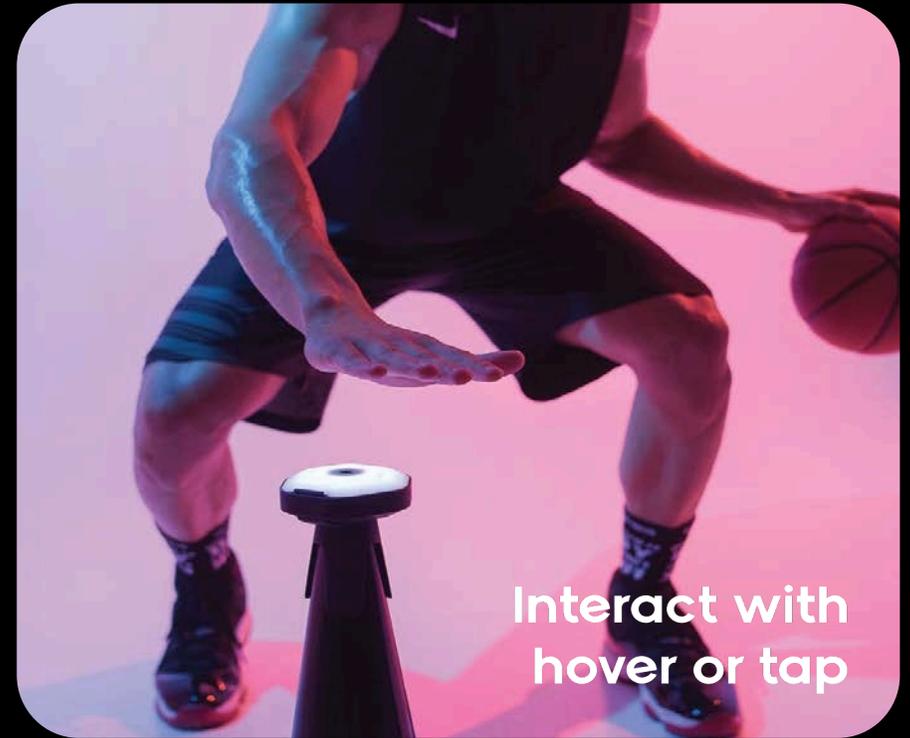

Some of the fields that Hiveact excels are, but not limited to:

Neurocognitive Training / Peripheral Vision / Decision-making / Reflex / Training
Physical Rehabilitation / Mental Engagement
Quicker Return to Play / Re-injury Prevention

The Reaction Lights

Interact with
hover or tap

Train smarter with Hiveact Reaction Lights.
The built-in motion and impact sensors enable
safe, **versatile, and no-contact training.**

Interact using your hands, feet, or sports
equipment to minimize injury risk and expand your
training possibilities across
agility, speed, and reaction.

Hiveact supports a broad range of drills for
speed, coordination, and performance
in any environment.

Complete kit for interactive training and peak performance.

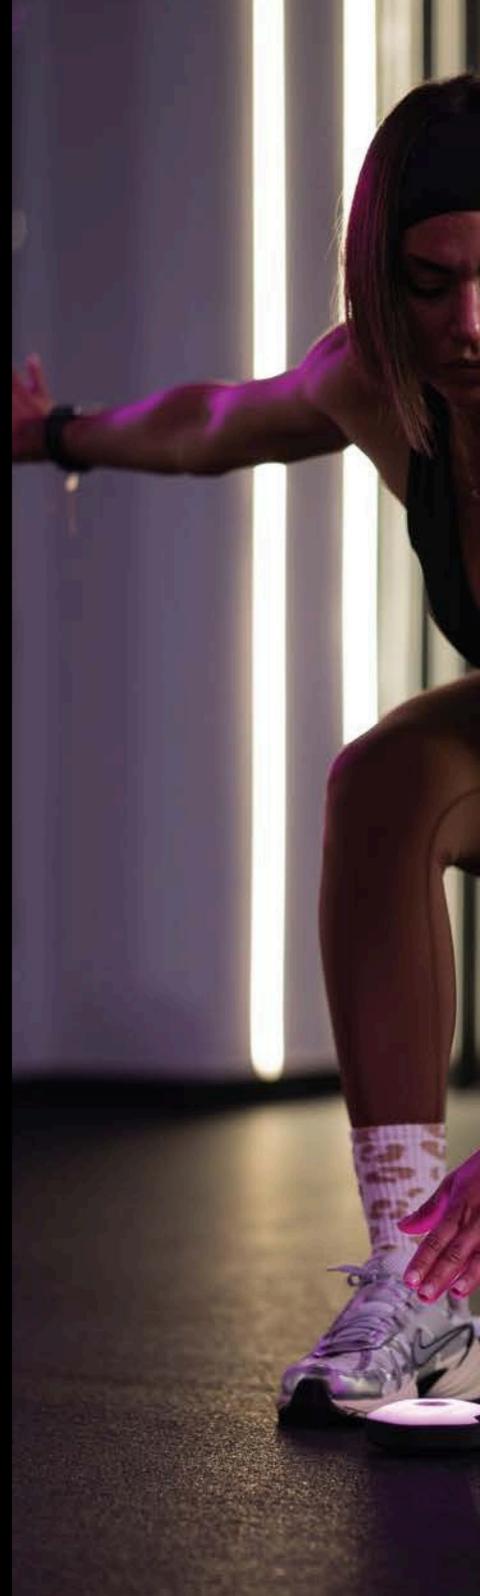

Build to last. Water, dust and drop resistant.

The Cells have an IP rating and are made of tough plastic with a soft touch surface and a rubber base which helps it grip to surfaces.

Attach Cells anywhere with the Bracket.

Using the included Bracket which securely attaches to the device, Cells can be mounted virtually anywhere.

Utilizing advanced sensors and technology.

Cells are equipped with the latest technology in sensors, LED connectivity and charging.
